Figure 1: Graph illustrating Kaplan-Meier survivorship curve with conversion to hip arthroplasty as the end point for whole cohort.
Figure 2: Graph illustrating Kaplan-Meier survivorship curve as worse case scenario with conversion to hip arthroplasty, poor WOMAC score (<40) and lost to follow-ups treated as end points for whole cohort.
Figure 3: Scatter-plot illustrating the effect of AI (A) and CEA (B) on WOMAC at follow-up.
